ON THE JOB SINCE 1893

Partnering with Distributors

Est. 1893

In 1887, a farmer living in Kewanee, Illinois invented a unique corn husking tool. He named that tool, which was a husking pin, the Perkins Boss Husker.

In 1893 the Perkins Husker Company was reorganized and emerged as Boss Manufacturing Company. The new company conceived the idea of manufacturing work gloves by taking note of the apparent needs of farmers in the Kewanee area. It was common practice in the early 1890's for farmers' wives to purchase cloth goods and make work mittens for their husbands. The Boss story from that point on is one of continued growth and sustained success as a leader in the glove industry.

Today, the Company's headquarters are still in Kewanee with distribution centers and sales personnel located throughout the United States and Canada. Boss has kept up with emerging technology and sophisticated distribution techniques to meet the needs of a complex and ever changing marketplace.

Through all of the changes one thing remains true, our unyielding commitment to provide quality products at competitive prices. Our number one priority is complete customer satisfaction.

Insulation

Comfort

Durability

Designed to exceed the stringent demands of hotmill applications. Proprietary textured *Boss Cord™* material provides superior insulation when exposed to damp, oily environments while enhancing grip ability.

Field studies indicate individuals wearing the *HotWing™* glove reported a major improvement in the elimination of “steaming”. This is a term used to describe the effects of heat when hotmill gloves have become slightly saturated resulting in burns and blisters.

Wing thumb design provides maximum comfort and greater longevity. The wing thumb removes the seam from the main wear area and complements the natural, lateral movement of the thumb, reducing hand fatigue.

Most hotmill gloves utilize burlap as a liner, that when exposed to the hands, cause itching and rashes. The soft felt liner found in the *HotWing* acts as a pillow significantly reducing hand irritations.

The no-nap *Boss Cord™* material reduces product and environmental contamination. The fuzzy napping found on most hotmill gloves separates easily contaminating finished product or air ventilation systems. The no-nap *Boss Cord™* eliminates this problem entirely while outwearing standard hotmill gloves 3 to 1.

Don't get all steamed up over average hotmill gloves. Try the *HotWing™*...because when it comes to gloves, *Boss* knows.

Soft felt liner for comfort and heat protection

Easy on/off double stitched band top cuff design

Wing thumb for comfort and dexterity

Textured *Boss Cord™* oil & liquid repellent

1BC42128A
