# All Delta First products...

*Tires are the third most expensive product in the trucking, construction, and OTR industries* with only labor and fuel costs ranking higher. Whether you use large quantities of \$300 tires or only a few tires that cost \$100,000, everything that can be done to extend their life is important. Coolants, lubricants, balancing agents and sealants can all help to add 10 – 20% to the life of a tire, and the cost of these products is small compared to the return on their investment.

Every product made at Delta First for the tire industry is designed to extend the life of tires and wheels. **Wheel Saver**<sup>®</sup> lubricants and coolants keep giant tires running cooler and make dismounting easy. **Liquid Tire Balance**<sup>®</sup> acts as both a balancing agent and coolant. The **Sealitup**<sup>®</sup> line of sealants will prevent flats and downtime.

Delta First products are retread-safe. That is, there are no components that can cause a chamber fire and the lubrication that makes for easier dismounting helps preserve the casings for retreading.

## ...Rust Prevention, Protection From Corrosion, Lubrication, and Extending Tire Life

## ...have a common thread...

### **Rust and Corrosion Prevention:**

Coolants, lubricants, and sealants from Delta First all contain a special formulation of corrosion and rust inhibitors that will keep wheels protected and clean. Whether the wheels are steel or aluminum they'll stay clean and corrosion free for the life of the lubricant.

#### ➤ **Contact Rust Inhibitor**

As the liquid moves around while the tire is in motion it's coming into contact with all parts of the wheel as well as the tire. The corrosion and rust inhibitors will coat the surface and preserve and protect the wheel and tire.

#### ➤ **Vapor Phase Rust Inhibitor**

Even if the tire is not in motion the liquids release molecules of the inhibitors and will prevent rust and corrosion.

All liquids from Delta First are tested at an independent laboratory under high heat and pressure to simulate about 12 months in a tire that's constantly in use. Nothing is sold unless it passes the stringent testing requirements of protecting wheels and tires at 100 psi and 100° Celsius (212° F).

# RIM CONDITIONERS

## Wheel Saver®

- Makes dismounting easy
- Saves casings
- Freeze protection to 20°F (-7°C)
- **Keeps tires running 10° - 20° cooler**
- Environmentally friendly
- No fibers; clear, green fluid
- Increases tread and tire life
- Eliminates rust on rims
- Will not block valve stems
- Prevents corrosion on wheels
- Easily washes out with water
- Prevents rust on wheels
- Specifically designed for large tires on heavy-duty equipment

| Product                                   | Primary Feature  | Freeze Protection | Comment                              |
|---|--|-------------------|--------------------------------------|
| <b>Wheel Saver®</b><br>(720)              | Cools Tires, Preserves Casing for Retread, Prevents Rust | 20°F (-7°C)       | <b>Best Product for Extreme Heat</b> |
| <b>Wheel Saver® Cold Weather</b><br>(722) | Cools Tires, Preserves Casing for Retread, Prevents Rust | -10°F (-23°C)     |                                      |
| <b>Wheel Saver® Plus</b><br>(723)         | Cools Tires, Preserves Casing for Retread, Prevents Rust | -40°F (-40°C)     |                                      |
| <b>Wheel Saver® Extreme</b><br>(724)      | Cools Tires, Preserves Casing for Retread, Prevents Rust | -70°F (-57°C)     |                                      |
| <b>Wheel Saver® Arctic</b><br>(725)       | Cools Tires, Preserves Casing for Retread, Prevents Rust | -107°F (-77°C)    | <b>Best Product for Extreme Cold</b> |

All Delta First **Wheel Saver®** products contain a corrosion package that prevents rust, has extra lubricant for easier mounting and dismounting, and is environmentally friendly.

# Sealitup® TIRE SEALANTS

## Sealitup® Heavy Duty

- Specifically designed for large tires on heavy-duty equipment
- Permanently seals injuries up to 3/8" with virtually no loss of air pressure
- 5 man-made fibers for added thixotropic properties
- No separation – stays in suspension
- Prevents and eliminates rust and corrosion
- Works to 15°F
- Eliminates rim, vent and pinhole leaks
- No flammable components/No risk in retreading
- Saves casings for recapping
- Keeps tires running cooler
- Increases tread and tire life
- Easily washes out with water

## Sealitup® Premium Heavy Duty

- All the same outstanding features of Sealitup® Heavy Duty PLUS—
- Specifically designed to work in extreme conditions:
  - when a large number of punctures are expected
  - excellent for lawn and garden
- Contains large amounts of Kevlar-type fibers and crumb rubber for extra sealing strength
- Permanently seals injuries up to 3/8" with virtually no loss of air pressure

## Sealitup® Hi-Speed

- Can be used in any application ranging from low to high speeds
- Coats the tread area of the entire tire evenly
- Will not cause tire imbalance
- Will not effect TPMS
- Prevents and eliminates rust and corrosion
- Increases tread and tire life
- No flammable components/No risk in retreading
- Easily washes out with water
- Eliminates rim, vent and pinhole leaks
- Keeps tires running cooler
- Saves casings for recapping
- Works to -25°F

## Sealitup® Tube

- Seals punctures in tube up to 3/16" diameter
- "Senses" air loss and rushes to plug hole
- No separation – stays in suspension
- 5 man-made fibers for added thixotropic properties
- No flammable components
- Designed to be "slippery" in the tire so there is never an out-of-balance
- 3 rare earth materials in different sizes for permanent patching
- Crumb rubber for added particulate matter
- Perfect for tubes on motorcycles, mowers, ATVs, agricultural vehicles
- Maintains air pressure
- Will seal multiple punctures
- Works to 15°F
- Extends life of tire and tube
- Easily cleans up with water

All Delta First Sealitup® tubeless products contain a corrosion package that prevents rust, has extra lubricant for easier mounting and dismounting, and is environmentally friendly

| Product (and Color)  | Contains Fibers?   | Freeze Protection: | Primary Applications  | Seals Holes Up To: |

**Use for ANY Hi-Speed  
application in ANY  
weather condition.**

# Liquid Tire Balance®

Many truck fleets use powders or beads as a balancing agent. LTB outperforms these competitive products and keeps tires cooler for longer life!

- “Fluid Dynamics” and centrifugal force push the LTB towards the low spot in the tire, counteracting the high spot, and balances the tire
- Keeps tires running cooler
- Eliminates rim rust and wheel corrosion
- Makes dismounting easier which preserves casings for retreads
- Extends tire life
- Will not clog valve stems
- Freeze protection to -40°F
- Available in 20 oz. poly bags for easy application, or quart bottles

---

## HEAVY DUTY PUMP

- Heavy duty pump with metal top that fits a standard 6-gallon bucket
- Approximately 8 ounces per throw
- Easily pumps all Sealitup sealants
- Guaranteed for 1 year under normal usage

---

## Tire Paint

- Available as a concentrate or pre-mixed
- Provides a lustrous black-satin finish
- Makes tires look new
- Covers crayon and chalk marks
- No harmful ingredients
- Water-based black paint dries quickly
- Withstands rain, water, and wear
- Easily applied with brush, sponge, mitt or sprayer
- Easy clean-up with soap and water

## Tire Paint Supplies

- *Paint Flow Line Cleaner* prevents dried paint from clogging lines and spray guns
- *Gun Lube* keeps paint from adhering to spray guns

---

## Liquid Bead Lube Concentrate

- A concentrate for easy mounting of tires
- Environmentally friendly, clean, and safe for the environment and humans

**Liquid Tire Balance®** contains a corrosion package that prevents rust, has extra lubricant for easier mounting and dismounting, and is environmentally friendly.

## Terms & Conditions

### Warranty

All products from Delta First are guaranteed to perform as stated. If you are ever unhappy with one of our products we will gladly exchange or replace it to satisfy your needs.

### Credit Terms

Terms are Net 30. Any payment not received within 30 days is subject to a 1.5% monthly finance charge.

### Shipping

Shipping is F.O.B. Delta First dock with a minimum \$1500.00 order. Carrier is at Delta First discretion unless other arrangements are made. Customer will pay all shipping on orders less than \$1500.00.

### Miscellaneous

Packaging:

Standard size container for **Sealitap**<sup>®</sup> products is a 6 gallon bucket with a plain top. Standard for **Wheel Saver**<sup>®</sup> products is a pour spout. Either top is available by special request.

### Other packaging available:

330 gallon totes; 55 gallon drums; 1 gallon bottles; quart bottles; 16 ounce bottles

Private labeling is available based on minimum annual volumes. Please call for information.

### Dose Charts

There are hundreds of tire sizes and all Delta First products work best and most cost effectively when used in the proper quantity. Refer to the extensive listing of dose charts at [www.deltafirst.com](http://www.deltafirst.com) for exact dose needed. Printed charts available upon request.

### Web Site

See photos, dose charts and descriptions at [www.deltafirst.com](http://www.deltafirst.com).

A white Intermediate Bulk Container (IBC) tote is shown, featuring a stainless steel metal cage for protection and handling. The tote has a green cap on top and a spigot at the bottom. The text is overlaid on the front of the tote.
