HYDRAULIC TIRE BEAD BREAKERS

**BB-501
HYDRAULIC
BEAD
BREAKER**

- Features/Benefits**
- : 5" opening - clamping foot to breaking shoe
 - : Works on any 10,000 PSI air hydraulic pump
 - : All external parts replaceable
 - : Hydraulics' repairable
 - : No bead or rim damage
 - : Satisfaction guaranteed
 - : Very competitive price
 - : Breaks beads smoothly

V501EM

V501TRK

*Special clamping claws available for earthmovers and tubeless truck rims (optional)

**OTR/EM
BEAD BREAKER
BB-901**

**Bead damaged is minimized by applying force directly to the 2 side rings, rather than to the bead of the tire.
Breaks beads On or Off EM unit.**

WARRANTY

180 Days Labor
1 Year - Internal Parts only

Misuse-breakage-normal wear and tear,
- not covered by our Warranty

MTP, Inc. reserves final judgment on warranties

Model BB-901 successfully changes all EM tires on 5 piece rims (rim body, 2 loose side rings, tapered & locking ring).

TIRE CART COMPARISON

7. When gripping arms engage tire stack and is tilted back, Locking pressure develops at point where slide sleeve moves on housing.
Positive braking and arms are locked in place.
"NO LOST LOADS, EVER"

6. Top support hold up rights in place, NO spreading of up rights

5. Semi-pneumatic or pneumatic tires

MODEL
EZ-1F

PATENT
6,530,584

Over
10,000
Sold

4. Gripping arms open and close on a straight horizontal line.
Engaging tire stack when next to other stacks presents NO problem.

1. Simple operation and design, only 5 moving parts

2. Ships UPS, up to 50% freight savings!!

3. Stack bottom tire rests directly below housing - allowing operator to lift and tilt simultaneously
Our low center of gravity design, greatly reduces lift problem!

Our so called competition

6. Pedal assembly design allows for maximum force directly to Open or Close gripping arms.

5. Bottom tire of stack sits inches away from housing, therefore operator must lift entire stack upwards and then tilt back

4. Complicated design, over 16 parts. Faulty braking system. Forced to use a type shock absorber to help in holding gripping arms in place while moving.

1. Gripping arms open and close on a clamshell motion. This requires extra room to engage stack of tires.

2. Gripping arm tabs provide most of carts ability to hold tire stack while moving. Need frequent replacement

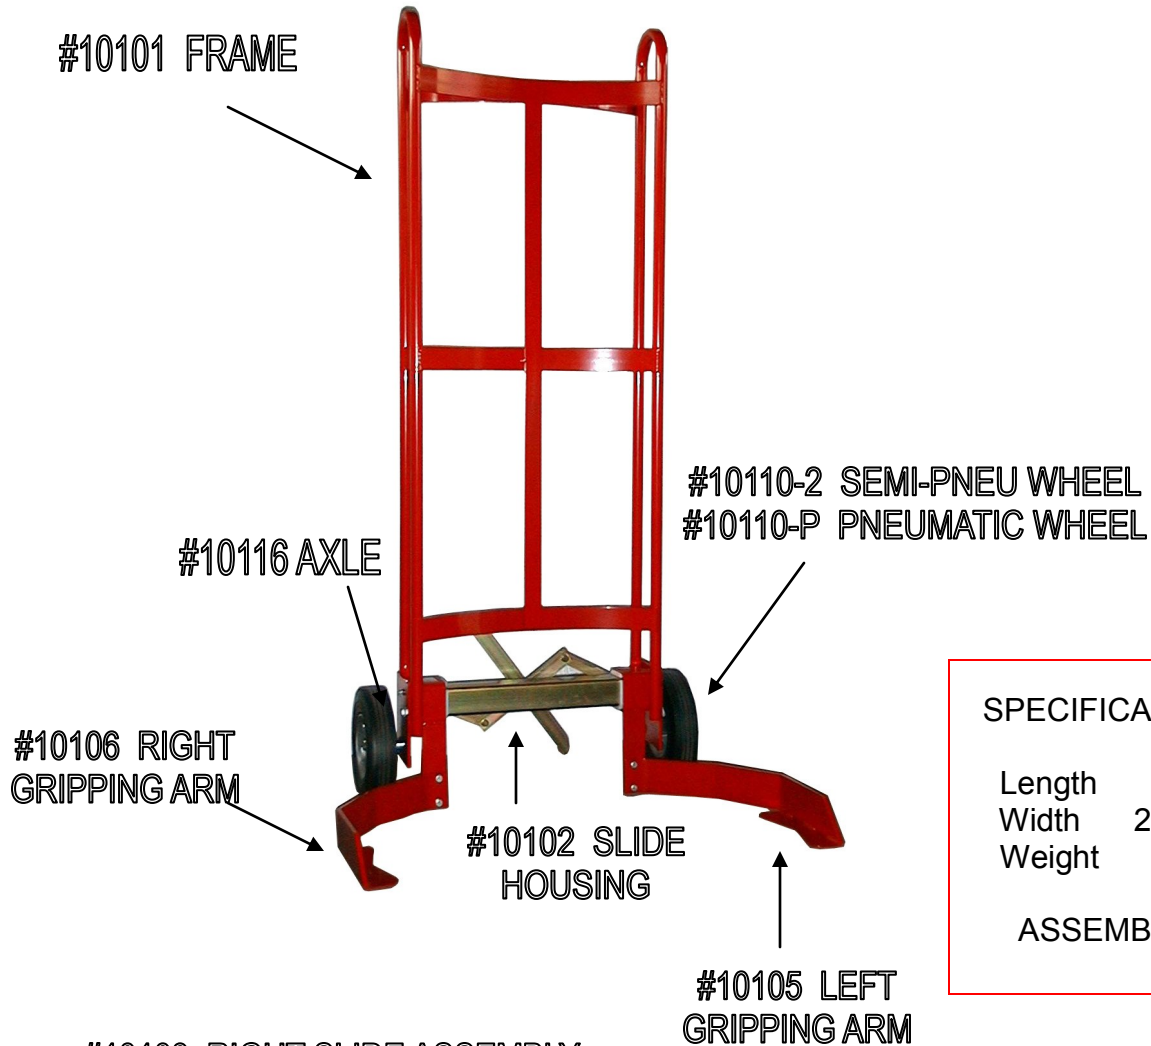

3. No top support
